## On The Brando Front

When Blanche Met Brando and Fan Tan

During Marlon Brando's lifetime he weathered tell all books by an ex-wife (*Brando For Breakfast* by Anna K.), an ex-best friend (*Bud: The Brando I Knew* by Carlo Fiore) and a scathing 900-page epic (*Brando: The Biography* by Peter Mansco). But when he died the gloves came off. We'll keep track of all of them (so you don't have to).

The first two up in the Brando-Derby is *When Marlon Met Blanche* and *Fan Tan*. The

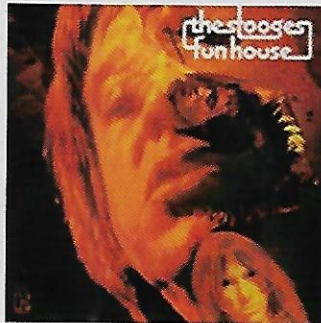

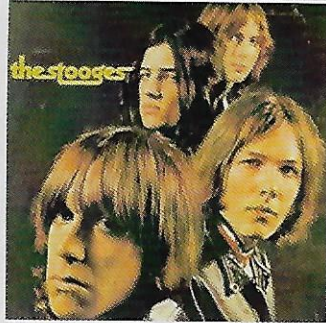

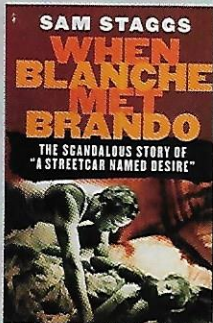

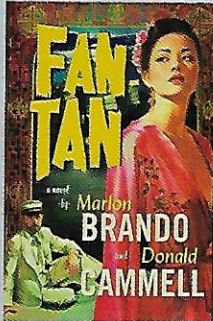

former is a bitchy account of both the play and movie that put

Brando on the map (*Streetcar Named Desire*). If you can get past

the author's obsession with Brando's butt and arm pit odor it's a funny, breezy read that entertains. *Fan Tan* is actually an unfilmed

screenplay turned novel that Brando co-wrote with Donald Cammell in the late '70s. A China Seas pirate saga set in 1927 where Brando's character is an aging (and overweight) rogue who hooks his crooked scheme with a beautiful gangster by the name of Madame Lai Choi San. Capers and adventures ensue in a tale filled with back stabbing, a fortune in silver and even the Royal British Navy tossed in for good measure. *Lard Jim* it's not but one can't help what kind of wild-assed film it would have made. Both books as well as the above ones available at...

## Now We're Going to Be Face To Face

The Stooges / Funhouse CDs

Ground zero for your punk history lesson, *The Stooges* and *Funhouse* being the first two releases from the legendary Stooges (and in Iggy and... not Moe, Larry and...) from the late '60s and early '70s. The punk pedigree here runs deep: the Velvet Underground's John Cale produced the first LP, the self titled *Stooges* and this deluxe Rhino double CD includes alternate mixes, liner notes by Jack White and Ben Edmonds and a hilarious intro from Alice Cooper (who said he would never go on after *The Stooges* as the audience was already used up). *Funhouse* also gets the double disc treatment and although it's pared down from the long out-of-print *Complete Funhouse* monster box set *Handmade Rhino* released a few years back it still blisters. All this adds up to enough Detroit fuelled noise rock to send mom screaming into the other room. Some say they ruined the '70s forever, fetish fans will note Iggy's "I Wanna Be Your Dog" was the first all out aural nasty put to loud and clear rock. (And no, "Louie Louie" ain't the same). Jack White calls *Funhouse* the most perfect rock record of all time and who are we to argue with a pasty faced modern master? Needless to say both are must haves, now if Rhino could just do the double disc treatment for *The Stooges'* swan song third LP *Raw Power* life would be close to perfect.

## SALT OPTICS SUNGLASSES

When's the last time you bought a pair of designer sunglasses that promised "11 layers of protection?" Sure you wouldn't want that from your overcoat or prophylactic but *Salt Optics* promises just that. Housed in a titanium frame and using organic designs and prism free lens technology, these sunglasses will make you feel both invulnerable to the elements

and incredibly stylish, like a cross between Superman and Neo. Designer, model, athlete, pig farmer and *Salt Optics* founder Richard Wilhelm said it over 100 years ago and it's still true today: "I want to be the influential quiet achiever." Influential, quiet, invulnerable and incredibly stylish." That ought to just about cover it.
